MONITORING REQUIREMENTS NOT MET FOR SKY FOREST MWC

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During Quarter (2) 2026, we failed to sample for Nitrate and therefore, cannot be sure of the quality of our drinking water during that time.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When All Samples Should Have Been Taken	When Samples Were or Will Be Taken
Nitrate	Quarterly	0	Quarter (2) 2026	July 28

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

Sampling schedule was missed for Nitrate. Sample for Nitrate was taken on July 28. _____
